

vCISO Services

RSI's vCISO is a security expert who collaborates with executives and technical teams to develop core strategies and implement security programs to meet regulations and compliance frameworks.

These services are designed to establish security policies and safeguard your organization's data.

Information Security Leadership & Guidance

Oversee and develop client's Cybersecurity Program from inception to documentation & implementation.

Internal Audit Liaison & Support

A Risk Assessment will be conducted, creating a list of risks & a remediation roadmap for your business goals. Findings and progress will be reported to key stakeholders.

Security Compliance Management

Ensure that all security efforts align with compliance requirements such as **GDPR, CCPA, and HIPAA**. We'll integrate these requirements into a comprehensive cybersecurity plan.

Security Policies & Procedures Development

We will collaborate with your team to create detailed documentation covering every aspect of your cybersecurity program. All centrally managed by RSI. We will work with your team to review regularly.

- AI Policy & Governance
- IT controls
- Risk remediation
- Policies, Procedures & Standards

vCISO Services

Incident Response Planning and Governance

We will monitor incidents & vulnerabilities while updating your Incident Response Plan according to changes in your IT environment & industry best practices.

Security Training & Awareness Governance

Includes bi-annual training sessions and Security e-newsletters to keep everyone informed about current threats and promote vigilance.

Steering Committee, Leadership, and Participation

RSI will meet with your exec team for quarterly updates regarding cybersecurity, compliance initiatives, and offer guidance on future security needs.

Asset Inventory, Network Mapping, Critical Data Classification

Create an accurate inventory of your IT assets and identify the locations of critical data. Establish ongoing processes for real-time maintenance inventory and ensure strong protections for all critical systems and data.

About RSI

Renaissance Systems is a human-centered technology partner focused on practical solutions, thoughtful strategy, and real execution. We believe the best outcomes come from combining technical expertise with creativity. We're committed to delivering work that is grounded, differentiated, and true to who we are as a company.
