

Governance, Risk, & Compliance

Build a clear path to compliance with **expert vCISO guidance** that helps clarify regulatory requirements, assess your IT environment, and prioritize the steps needed to reduce risk.

Company Snapshot

RSI makes it easier to manage IT, cybersecurity, and GRC by giving you a single trusted provider that understands how your business operates. Our right-sized, purpose-built services adapt to your business model, environment, and internal team structure, so you can get the support you need without confusion, overlap, or friction.

GRC SERVICE OVERVIEW

Security Governance and Program Oversight

Security governance support involves helping leadership identify program priorities, risks, and necessary actions for effective cybersecurity management that aligns with business needs & industry frameworks.

Policy and Documentation Maintenance

Involves maintaining security policies, standards, procedures, and supporting documentation. Documentation will be reviewed and updated as needed. Policy and procedure updates will be written in a practical format appropriate for business size and operating model.

Risk Management Support

RSI will support the ongoing identification, tracking, and management of cybersecurity risks. Such as helping to maintain visibility into security risks and make informed decisions about remediation, acceptance, or prioritization.

Continuous Compliance and Security Advisory

Ongoing advisory support as security obligations evolve. This flexible advisory model allows RSI to address compliance while building a security program that can mature over time.

Customer and Third-Party Security Support

Support for security-related inquiries from customers, vendors, and partners, including questionnaires and contract requests to ensure accurate and consistent responses while managing commitments to unimplemented requirements.

Security Awareness and Workforce Security Oversight

Provide oversight and guidance related to security awareness and workforce security expectations. May include helping to maintain a basic security awareness program aligned with any industry regulations, frameworks, and general security best practices.

Incident Response Advisory Support

Advisory support in the event of a suspected or confirmed security incident. This support is intended to help coordinate response activities, document actions taken, and identify lessons learned.

AI Policy & Governance

RSI's expert vCISO provides AI governance to help organizations evaluate and oversee AI tools responsibly, while developing AI policy, procedures, and training materials for leadership and employees.
